Subject: Re: DWR's Water Plan Update

I urge all of you to develop a plan that takes into consideration the long term impact to our natural water sources and their micro-environments. These waterways should be unspoiled for our future generations to enjoy, as we have enjoyed them. I urge you to place greater importance on water use efficiency, recycling and groundwater treatment, rather than the construction of dams and diversions, in order to solve our water crisis in future years.

Cheers,

Adrien Pritchard
